PRODUCT FEATURES:

- 15 watts of power for extra curing resulting in stronger extensions
- Natural looking nail extensions
- Allows the natural nail to grow underneath
- Everything needed to create professional nails
- Step-by-Step DVD included
- Mains operated

INDEPTH PRODUCT DESCRIPTION:

Rio UV Nails uses specially formulated gel which reacts with UV light to create very strong, natural looking nail extensions while allowing your natural nail to grow freely underneath. Rio's UV gel and UV lamp can be used without extension tips to create a strong, protective layer on your own natural nails, promoting longer, stronger nails which don't split or peel. The high gloss finish also prolongs the life of nail polish and reduces the likelihood of chipping. With the correct maintenance and aftercare procedures, UV Nails can last up to 3 months.

Other methods result in a thicker construction, which look false and do not give the smooth, high gloss, natural finish of UV Nails. The UV Nails kit comes complete with everything you need to get started straight away.

The Application

Before you begin read the user guide and watch the DVD for great tips and techniques on how to use the UV Nails kit. Both the user guide and DVD go through the process step by step to ensure that you get the most out of the kit. They will show you how to prepare the extensions, prepare your nails, blend in the seams and how to apply the UV gel before you use the UV lamp.

Once you have cured your nails under the lamp for the recommended time, finish off and buff the nails to give them an even glossier natural shine.

The user guide and DVD also cover the best ways to remove the nails as well as giving all the aftercare tips you will need to enjoy the product for years to come.

BOX CONTENT:
